

Dear Families,

This homework pack has been made to support your child's learning at home for 10 school days. This homework was created to do WITH family members. 😊

Some activities and problems will be more challenging than others...the goal is to build problem solving skills with family support. We know that many families are very busy, so you can choose to complete different tasks on different days if that works for you. Please attach your child's work and return with the completed sheet when school resumes.

To complete the homework, your child just needs notebook paper or blank printer paper. Have your child date the top and choose 2-4 activities to complete each day.

For some students, organization is challenging so this is another great practice opportunity! Please show your child how to date the pages and keep the week's work together. We've included 2 example photos in this pack.

Please feel free to keep the work at home or send it back to school.

Thank you for your continued support!

- The First Grade Team

WORK SAMPLE
